

Gateways for Segment Coupling

Connect machines using different network technologies

- Coupling of different network segments
- Gateway acting as a device in both networks
- Support of all major Serial, Fieldbus and Industrial Ethernet networks as device
- Secure network separation, as only process data are exchanged
- Comfortable commissioning via the Hilscher toolchain

EtherCAT®

PROFIBUS

PROFINET

EtherNet/IP®

DeviceNet™

CANopen®

Sercos
the automation bus

CC-Link

CC-Link IE Field

Modbus

ETHERNET
POWERLINK

ETHERNET

Serial

Available formats

	netTAP 50	netTAP 100	netTAP 151
Dimensions (L x W x H)	100 × 25 × 70 mm*	100 × 52 × 70 mm*	99 × 22.5 × 114.5 mm*
Protection class	IP 20	IP 20	IP 20
Mounting	DIN 60715 rail	DIN 60715 rail	DIN 60715 rail
Memory card	✗	✓	✓
USB Diagnostic port	✗	✓	✓

Note: All technical data may be changed without further notice.
*without connector

Gateways for Segment Coupling

Coupling of different network segments & technologies

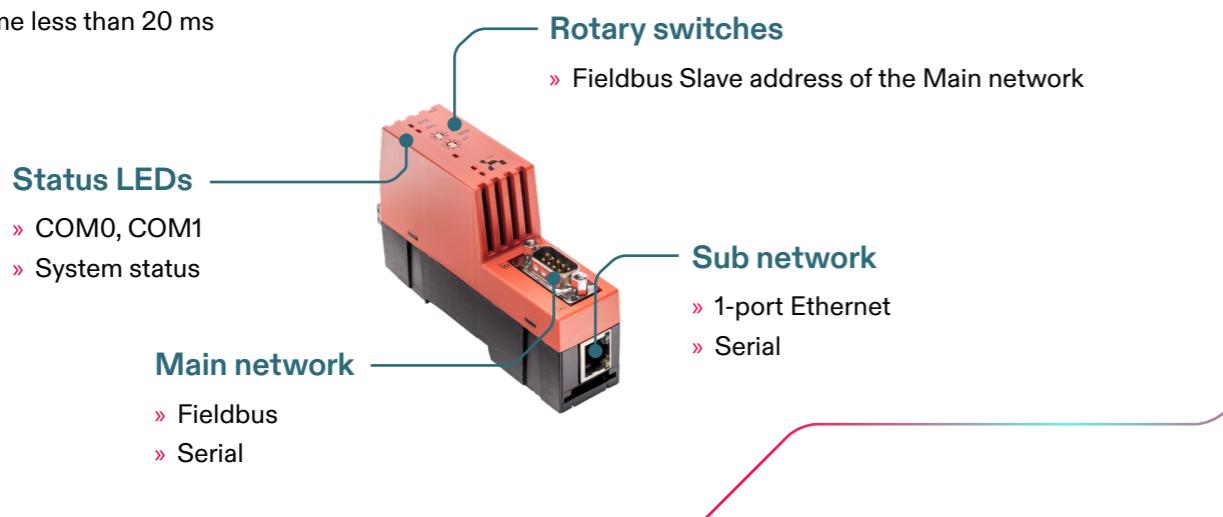

- Connect machines using different networks
- Secure segmentation within the same network technology
- Maximum convertible number of I/O data is determined by the protocol with the lower amount of I/O data
- Support of cyclic data only and protocol status information

NT 50

Entry class gateway

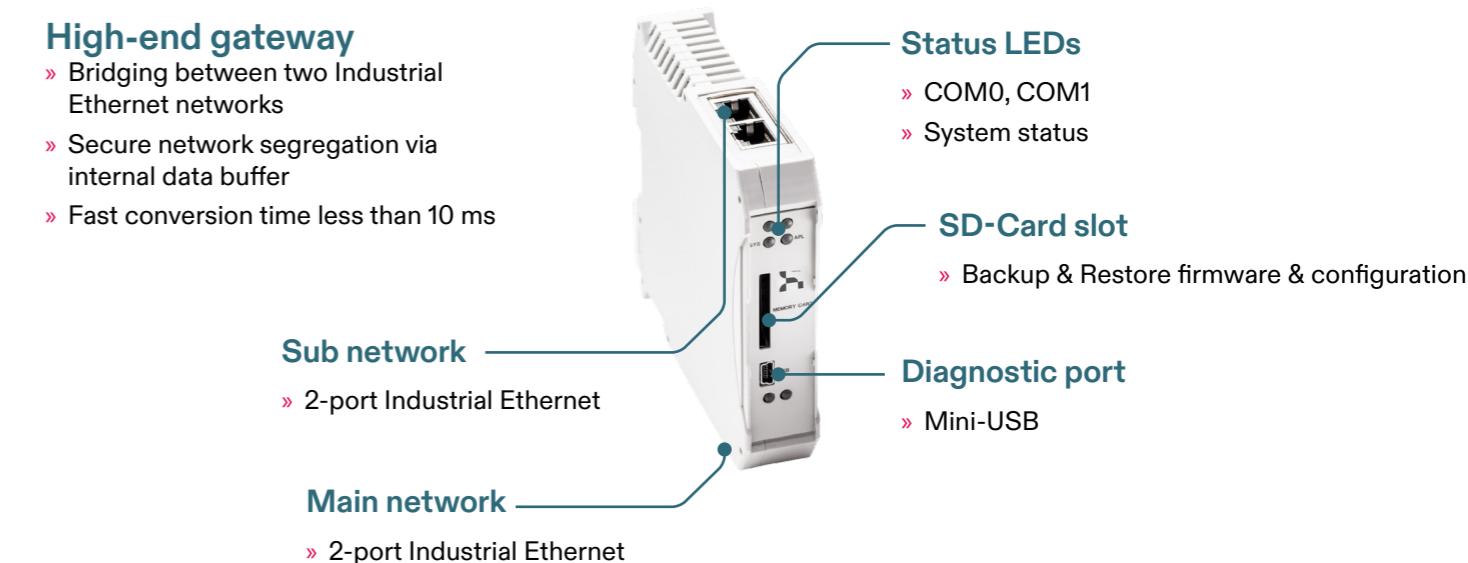

- » Slim and compact design
- » Focus on essential functionality
- » Conversion time less than 20 ms

NT 151

High-end gateway

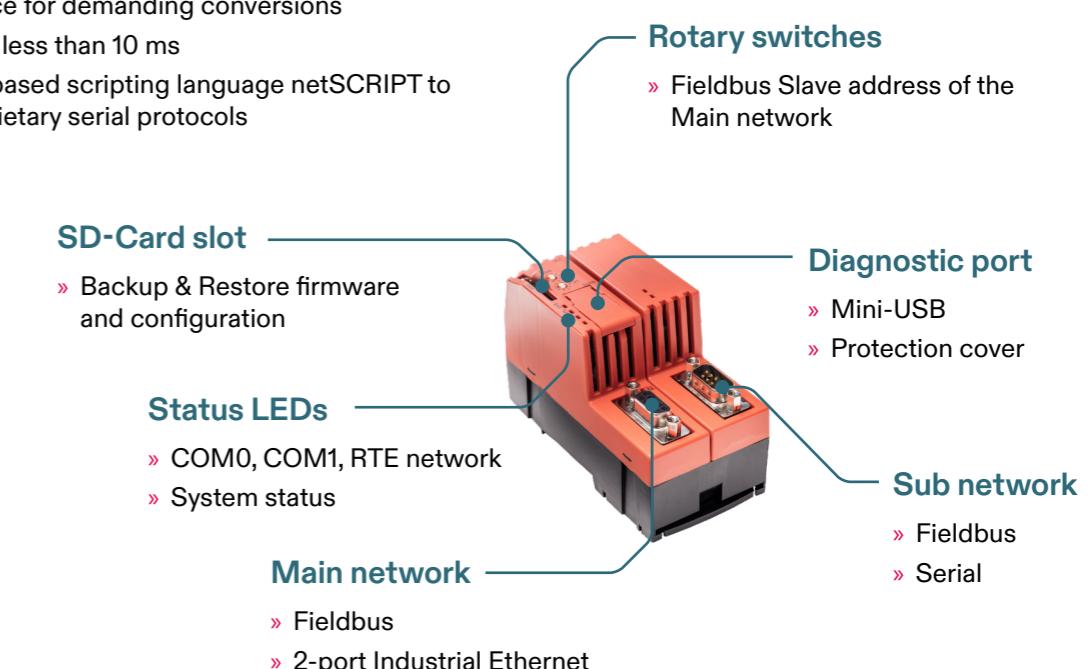

- » Bridging between two Industrial Ethernet networks
- » Secure network segregation via internal data buffer
- » Fast conversion time less than 10 ms

NT 100

Flexible gateway

- » High performance for demanding conversions
- » Conversion time less than 10 ms
- » Support of Lua-based scripting language netSCRIPT to programm proprietary serial protocols
